### Department of Environmental Quality Montana Cannabis Waste Guidance

Marijuana plant waste that must be rendered unusable before disposal includes:

- o Marijuana plant waste, including roots, stalks, leaves, and stems that have not been processed with solvent;
  - o Waste solvents used in the manufacturing process;
  - o Spent solvents, laboratory waste, and excess marijuana from any quality assurance testing; and
  - o Marijuana items that ultimately fail to meet testing requirements (ARM 42.39.307).
- The method allowed to render a marijuana item unusable is by grinding (for solids) and incorporating or absorbing (for liquids) the marijuana item with other ground materials, so the resulting mixture is undesirable, unrecognizable, unfit for human use, and incapable of growth or germination. For whole marijuana plants, the resulting mixture must be at least 50 percent non-marijuana waste by volume.

How to make items unfit for consumption

The following guidelines provide processors guidance on how to render items unfit for consumption and provide information on how to dispose of them. OLCC also provides guidance on how to keep such material secure.

-Plants and usable marijuana

The material should be composted or disposed of in a landfill if composting isn't available. To render it unfit for consumption, use one of the following methods:

-For composting - Mix with yard debris, wood chips, sawdust or manure

-For landfill disposal - Mix with soil, sand or other garbage

-Burn if permitted by law
